Synergetics Celebrates 40 Years of Management Consulting Excellence

PORTSMOUTH, NEW HAMPSHIRE, NOVEMBER 10, 2015 – Synergetics is celebrating 40 years of excellence as an innovative management consulting organization. Credited in solving some of business' toughest problems, Synergetics was one of the early pioneers in "implementation consulting" and is world renowned for its hands on method to guarantee results. The privately owned and operated company was founded in 1975. Since then, Synergetics has grown into an international organization with more than 150 global associates and is headquartered in New England.

During the past 40 years, Synergetics has built a culture of excellence and results orientation by providing clients with a highly unique, three phase approach across nine industry verticals, with particular focus on revenue enhancements and cost optimization through operational excellence.

"We are so very appreciative for the opportunities to provide our valued clients with sound advice and tangible solutions. Our company's stellar reputation and proven track record have been built on these engagements. We thank them for their trust and confidence."

Over the last 4 decades, Synergetics has effectively achieved more than \$8 billion in EBIDTA improvements over 1,600 engagements across 6 continents.

"We have accomplished many things on this 40 year journey, and have partnered with our clients to think outside the box to achieve dimensional improvements in operational efficiency and effectiveness. We have been able to add maximum value to our client engagements by attracting and retaining the most talented professionals, most of whom are experienced operators and leaders in their fields. Now, we are looking forward to the road ahead. While we believe management consulting will continue to evolve and become more competitive, what will continue to differentiate Synergetics from the rest is our ability to guarantee results. Our vision is to become the global destination for implementation consulting expertise, especially within Private Equity and their investment companies, from Lower Middle Market to Fortune 500 companies. Our future success will depend on the ongoing trust of our valued clients."

– Jim O'Neill, President, CEO

ABOUT SYNERGETICS

Synergetics is a privately held New England-based Management Consulting firm established in 1975. With office locations in the US and UK, Synergetics operates internationally and employs over 150 professional analysts, consultants, project managers, and subject matter experts. As one of the largest "Implementation Consulting" organizations, Synergetics has completed over 1,600 business process engagements across nine distinct verticals to build more than \$8 billion in bottom line profitability and improve overall operating efficiencies. Synergetics works with a diverse client portfolio of leading industrial and service corporations across private equity, small and medium enterprises, and Fortune 500 Companies. With customized services and solutions, Synergetics performs hands on detailed management, financial, and operational assessments to develop and deliver specific cost savings and revenue enhancement initiatives.
